healsens

WEB SUMMIT 2026

One prevention engine. Three ways in.

Healsens turns health data into a personalized screening plan — then keeps it current as new risks, results and lifestyle signals appear. Same engine: a consumer app and a healthcare intelligence layer.

01 · EMPLOYERS

Ready product for employees

Corporate wellness that is not a generic checklist. Personal checkup plans, biomarkers, biological age, and follow-up.

02 · PROVIDERS & PLATFORMS

License the intelligence

Risk view, missing-data detection, screening recommendations, result interpretation — without taking the whole consumer app.

03 · LABS & DIAGNOSTICS

A companion to every test

Channel or joint product: results that come with a longitudinal view, and a reason to test again.

healsens

Same age. Different screening needs.

Two men, both 45. One has no family history of prostate cancer. The other has a father who had it. To a system that looks only at age, they are almost the same. For prevention, they are not. The second man may need screening earlier — and for both, PSA results decide when to screen again. Prevention is not a checklist. It is a plan that evolves with the person.

PERSON A · 45

No family history

Standard interval. Next step depends on his own results, not a generic age table.

PERSON B · 45

Father had prostate cancer

May need screening earlier. The plan updates as new risk factors and results appear.

This logic already runs across 23 chronic-disease and risk areas. Same engine, three offers:

EMPLOYERS

Employee wellness, ready to pilot

- Personal checkup plans
- Biomarkers & biological age
- Lifestyle, sleep, stress
- Working consumer app

Ask: 30-min pilot call

EHR · CLINICS

Health Intelligence Infrastructure

- Risk models, explainable scores
- What is missing in the record
- Screening roadmap & intervals
- APIs — license the layer

Ask: technical intro

LABS

Channel or joint product

- Companion to lab results
- Structured intake of reports
- Longitudinal follow-up
- A reason to test again

Ask: partnership talk
